

December 1, 1976

Mr. Charles B. Edel
Edel Ford Tractor Co.
1630 East Chestnut Expressway
Springfield, Missouri 65802

Dear Mr. Edel:

On December 1, 1976, personnel from this office inspected a recently constructed canopy over your outside washing pad. Since this canopy apparently prevents storm water from entering the sanitary sewer during periods of normal rainfall, you are in substantial compliance with City, State and Federal Laws.

Thank you for your cooperation in correcting this problem. If you have any further questions, please feel free to call.

Yours truly,

Eugene D. Pabst
Water Pollution Control Inspector III
Surveillance & Enforcement

Springfield, Missouri 65802

Dear Mr. Edel:

On August 9, 1975 you sent a letter to this office in reference to your outside washing pad. In this letter you stated that you were going to attach this pad to the sanitary sewer so as to eliminate your need for an N.P.D.E.S. Permit from the State of Missouri. Also, you stated that you were planning to construct a canopy over this pad to keep storm water from entering the sanitary sewer.

Over a year has passed since this drain was attached to the sanitary sewer and still you have not constructed the covering as you stated in your letter of August 9, 1975. Since this drain does take in storm water, then you are in apparent violation of the Springfield City Code, Chapter 30, Sec. 30-5 which clearly states: "No person shall discharge or cause to be discharged any storm water, surface water, ground water, roof runoff, subsurface drainage,... to any sanitary sewer."

Please contact this office within 15 days as to what action you plan to take to correct this problem.

Yours truly,

Eugene Pabst
Water Pollution Control Inspector III

Dear Mr. Pabst,

In reference to your letter dated October 19, 1976, I have signed a contract with the H. B. Wall Co. to construct a steel canopy over the outside wash pad. Completion time is estimated at two to three weeks.

Trust this meets with your approval, and will clear up this matter.

Yours truly,

Springfield, Missouri 65802

Dear Mr. Edel:

Thank you for your letter of August 9, 1975, which Mr. Schaefer has referred to me. Your plan for a canopy to cover the outside wash pad is acceptable to the Water Pollution Control section. We appreciate very much the prompt attention you have given to this matter. Converting this wash area so as to discharge into the sanitary sewers will apparently eliminate your need to obtain permits from the State and Federal Governments to cover a discharge to natural waters.

Please contact this office as soon as the work is completed and we will be happy to certify to the Missouri Department of Natural Resources that a discharge no longer exists. If we may be of further assistance or can answer any questions, please do not hesitate to call.

Yours truly,

Charles H. Criswell
Associate Sanitary Engineer
Water Pollution Control

August 9, 1975

Dear Sir,

We are planning to put a canopy over the outside wash pad, which will then meet the city code for entering the sanitary sewer, as per your agreement with inspector Morris Mitchell. I appreciate your help in working out this problem.

Yours truly,

Gentlemen:

The City of Springfield, Department of Sanitary Services has advised us that a discharge of wastewater exists at your facilities located at 1630 East Chestnut Expressway, Springfield, Missouri.

All discharges of wastewater need to file application for a Federal National Pollutant Discharge Elimination System Permit and State of Missouri Operating Permit, permitting such a discharge.

We suggest that the City of Springfield be contacted for assistance in possible elimination of discharge. In the interim please make application for the necessary permits to continue discharge. Forms for this purpose are enclosed.

Should you have any questions concerning this matter, please feel free to contact us.

Yours truly,

James A. Burris, P.E.
Acting Chief, Water Quality Program
Springfield Regional Office
Department of Natural Resources
